Discussion:

Mr. Gerald Vick, WES Engineer was present to answer questions. Mr. Larry Goats, 708 Woody Drive, stated that he totally opposes the request. Mr. David Meade, 6224 Cayce Lane, expressed concerns that Cayce Lane cannot take on this project safely, water runoff, flooding, and the wrecks in the curve when it rains. Ms. Carol Welch, 116 North Cayce Lane, expressed concerns for the safety of future residents, the road is narrow, no shoulders on the road, extra traffic, straighten and widen the road, drainage, and mud. Ms. Erin White 2659 E Sheepneck Road, Culleoka, the daughter of Dr. Langa previous owner, shared concerns for drainage issues, the ditches are not adequate, it is a narrow non- shoulder road, the S curve, traffic, and Cayce Lane is hazardous. Ms. Paulette Livengood, 6227 Cayce Lane, she is opposed to this, she has written letters, it will be a dangerous place both entrances, and accidents. Mr. C. L. Sullivan, 1652 Wellington Drive, expressed his opposing the zoning change for property 6218 Cayce Lane, concerns for the schools being maxed out, tax payers, traffic, Cayce Lane is just a narrow road, traffic light, and it will be an issue for emergency vehicles. Ms. Jennie Paraschak, 6213 Cayce Lane expressed her opposition to this request, flooding issues, she shared pictures, the S curve, and no shoulders. Councilman Coleman stated that tomorrow City Council will be reviewing a report the Engineer has been studying the area that you all live in and he recommended coming to that. Ms. Sandy Thurston, 6223 Cayce Lane, expressed concerns with the request not fitting the character of the homes that are already there, blasting, repairs, who will be responsible, and she is opposed to this development. Mr. Robert Thurston, 6223 Cayce Lane, opposed to the rezone of the property, mailbox, water issues, and accidents that don't get reported. Daryl Shuff, 6219 Cayce Lane, discussed a letter of opposition to the change of zone, traffic, safety issues, creation of an influx of students, lack of school bus drivers, CD-3 zone would not blend with the rural countryside low density character, railroad tracks, new housing, vehicles, ground water flooding, the S curve, and difficult to walk on Cayce Lane. Ms. Susan Shuff, 6219 Cayce lane, expressed concerns with infrastructure, water drainage, traffic, safety issues, narrow road with no shoulder, road erosion, accidents, and dangerous curve. Mr. Bill Welch, 1116 North Cayce Lane, expressed concerns with traffic, and dump trucks. Mr. Gerald Vick stated they have had discussions size of the property, improvements, adding safety concerns, TIS study. Councilman Coleman asked Mr. Vick about road improvements. Mr. Vick stated that at the concept stage they proposed to provide a twenty-foot additional right-of-way and dedicate that to the City, also adding sidewalks along Cayce Lane. Beyond that they would look at needed improvements based on the traffic impact analysis to determine what if anything additional might be needed. Councilman Coleman inquired about the study. Mr. Keltner stated that the Traffic Study would happen at the Preliminary Plat stage. Dr. Martin stated that the Board has heard from several citizens tonight many of them have the same concerns which reinforce their urgency with living nearby. At the study session the Board talked about the cul-de-sacs are those in or out. Mr. Vick stated the concept sketch that you have before you with one hundred watts is the one they are proposing should they get the rezone. It does not have a cul-de-sac. Dr. Martin asked Mr. Keltner in reference to the traffic study are you saying if

DRAFT

he was saying that is not why they are at this point in the Board's consideration before some action can take place with a lack of motion for rezone, that is not required. Director Keltner stated yes. Dr. Martin also stated that also mean that the safety study which Mr. Vice Chairman brought up last week is not required either. Mr. Keltner stated that you would do that at the same time. Dr. Martin stated that she keeps hearing people talking about the capacity of the school system, and she feel compelled to say this, because she lives in Columbia, TN and just got appointed to the Planning Commission. She means no disrespect, but when you approach the podium and say that we make decisions, and the County has to deal with them. Dr. Martin said she is a tax paying County resident that lives in the City. She asked them please to consider those statements, because whatever the Board votes on they have to deal with it too. So, she appreciates that consideration, she is a very proud citizen of Maury County. Dr. Martin also stated that we are way up on the development of Fiberon, and Ultium Cell. One being on Nashville Highway, and one being off Hampshire Pike, and she certainly understand the comments being made about investing and homes. She certainly understands the pictures, and all of the concerns about the size of road, the deterioration of the permit, the water runoff, and all of that. She will text the City Manager in reference to the pipes that were supposed to be replaced to check to see where that was, in our process. She just got off City Council and she is hoping that, it is not something that was missed on her watch. As we look at Maury County and infrastructure all of things that were mentioned tonight as fellow citizens of the City of Columbia who are also County taxpayers, we often hear a lot about the school system, and if we build houses then kids may live in them, the elderly may move here as a retirement place. As we look at the school system capacity is from the system. Her daughter served on the school board for four years, and she heard for four years all the things that Columbia was doing that was impacting the school system. She also heard all the things that Spring Hill was doing that's impacting the system. There are a lot of opportunities to be looked at, one hundred and four houses and how many students school age that might live in those houses. She stated that she doesn't know, we are guessing, but there might be some. For her the capacity of the system is what she considers, not necessarily the school that is right down the road, because we are paying taxes that feed into the school system. We have a young lady on this Board that has been in the school system some forty years, and she knows a lot about the school system. We have schools in the system that are unit schools and their capacity student, teacher ratio is much smaller than some of our City schools. She also stated that she wants to remind you all that in the City of Columbia she recalls Macedonia school being closed, Carver Smith school being closed, College Hill school being closed, and McDowell was closed a couple of years ago. When you start talking about capacity of the system she also asks them to consider what's been closed in Columbia, and what is still thriving, and low teacher, student ratio in the rest of this great County that she chooses to live in. She wants housing in Columbia, Tennessee, because she wants the people that work for industry here to live here, to play here, to go to church here, to go to school here and to reiterate here. Dr. Martin also stated that we need housing, we've got a lot of problems with this presentation that is before the Board tonight, a lot of concerns. The water is a concern, and the Board has a lot of things to consider. When you start seeing water in this area like we are seeing something has to be done. She stated that she needs to ask this Planning Commission what else can we do to get more housing in

DRAFT

Columbia, what else can we do to get more housing on Casey Lane, and how do we do that with the concerns that have been listed by the citizens. She asked how many houses is it per acre. Mr. Vick stated by calculation three point three eight. Councilman Coleman stated that he reiterates Dr. Martin's concerns, and he asked if there had been an opportunity to see anything come out on the Army Core Presentation for this area. Mr. Vick stated that he has not, and he plan to be here tomorrow night at the meeting. Dr. McClain stated the numerous presentations tonight, and she asked Mr. Vick if he had the opportunity to review any of this information. Mr. Vick stated that he has not seen any of those documents. Dr. McClain said it will be very difficult for her to pass the request at this time period. Further discussion including the deferring process. Dr. Martin made the motion to defer so that the Board can see the Army Core report tomorrow evening, and number two so she can look more at the two zoning, and see what could happen if it stays the way it is. Dr. McClain seconded the motion. The motion to defer passed three to zero with Mr. Goatz and Mr. Hutto abstaining.

Vice Chair Councilman Coleman transferred the meeting back to Chairman Goatz.
Mr. Keltner asked Mr. Harper to clarify the time for the special called meeting. Mr. Harper stated that the special presentation meeting is 4:45 p.m. tomorrow.

3.7 Case #23-0024

Request from Development Services concerning an update to the Planning Fee Schedule.

Staff Recommendation:

Mr. Kevin McCarthy, Planning Associate II, presented the request to the Commission. He asked the Board to recommended the adoption of the revised fee schedule in order to improve our cost recovery. He also discussed the revision of the Engineering fee schedule.

Discussion:

Discussion included being under staffed, additional fees, revenue, it would be helpful to have more people, cost recovery, letter advertising, modernizing fee schedule, currently no fee for deferrals.
Mr. Goatz made the motion to approve, with Dr. Martin seconding. The motion to approve passed five to zero.

4. OTHER BUSINESS:

In other business, Mr. McCarthy presented an update to the Connect Columbia comprehensive plan update and the first meeting with the Steering Committee held the past week. The next public outreach will be held March 21, 2023 at Fairview Park.

The DEVELOPER further agrees that if the performance surety executed to secure the value of the work to be performed under this agreement, due to inflation or rising costs, is determined to be inadequate by the City Engineer to secure the cost of said IMPROVEMENTS at the time an extension is sought, the DEVELOPER will provide the additional security to bring the performance surety amount in line with current cost projections as made by the CITY. The DEVELOPER understands that the DEVELOPER's failure to follow the extension procedure constitutes a breach of this agreement and places the DEVELOPER in violation of the Subdivision Regulations. The DEVELOPER further understands, that should the DEVELOPER fail to complete any part of the work outlined in this agreement in a good and workmanlike manner as approved, the CITY shall reserve the right to withhold and withdraw all building permits within the PROJECT until all items of this Agreement have been fulfilled by the DEVELOPER.

In the event of a disagreement as to compliance with or interpretation of the Construction Plans and the CITY'S specifications, the decision of the CITY shall be final and binding on the DEVELOPER. If the DEVELOPER fails to construct in accordance with the approved Construction Plans or to comply with the CITY'S specifications, the CITY may issue a stop-work order and DEVELOPER, hereby, agrees to be bound by such order.

B3.10 Testing

The DEVELOPER agrees to pay the cost of all engineering, inspection, and laboratory cost incidental to construction of the streets, sidewalks, utilities, sewers, compacted fill material, and other facilities included within this agreement. Such testing includes, but is not limited to, material and density testing.

B3.11 Scrap Removal

The DEVELOPER agrees to comply with all local, state, and federal rules and regulations regarding waste material and debris disposal.

B3.12 Traffic Control

The DEVELOPER, hereby, agrees to prepare a traffic control/detour plan where required and shall submit said plan to the CITY for review and approval. All traffic control and safety devices, including

signs, lane markings, and barriers necessitated by construction activity undertaken pursuant to this agreement shall be installed and maintained by the DEVELOPER. All traffic control devices shall meet the standards and be installed in accordance with the latest edition of the Manual on Uniform Traffic Control Devices for Streets and Highways, published by the United States Department of Transportation.

B3.13 Temporary Facilities

The DEVELOPER shall provide all temporary facilities including but not limited to utilities and roadways, that are determined by the CITY to be required in connection with or as a result of interruption of service or access that occurs as a consequence of construction activity associated with the work covered by this agreement. Such temporary services shall in all regards and at all points in time be adequate to assure emergency access and adequate fire flows.

B4 Acceptance of Improvements

B4.1 Completion of Improvements

Formal acceptance shall follow the procedure established in the Subdivision Regulations.

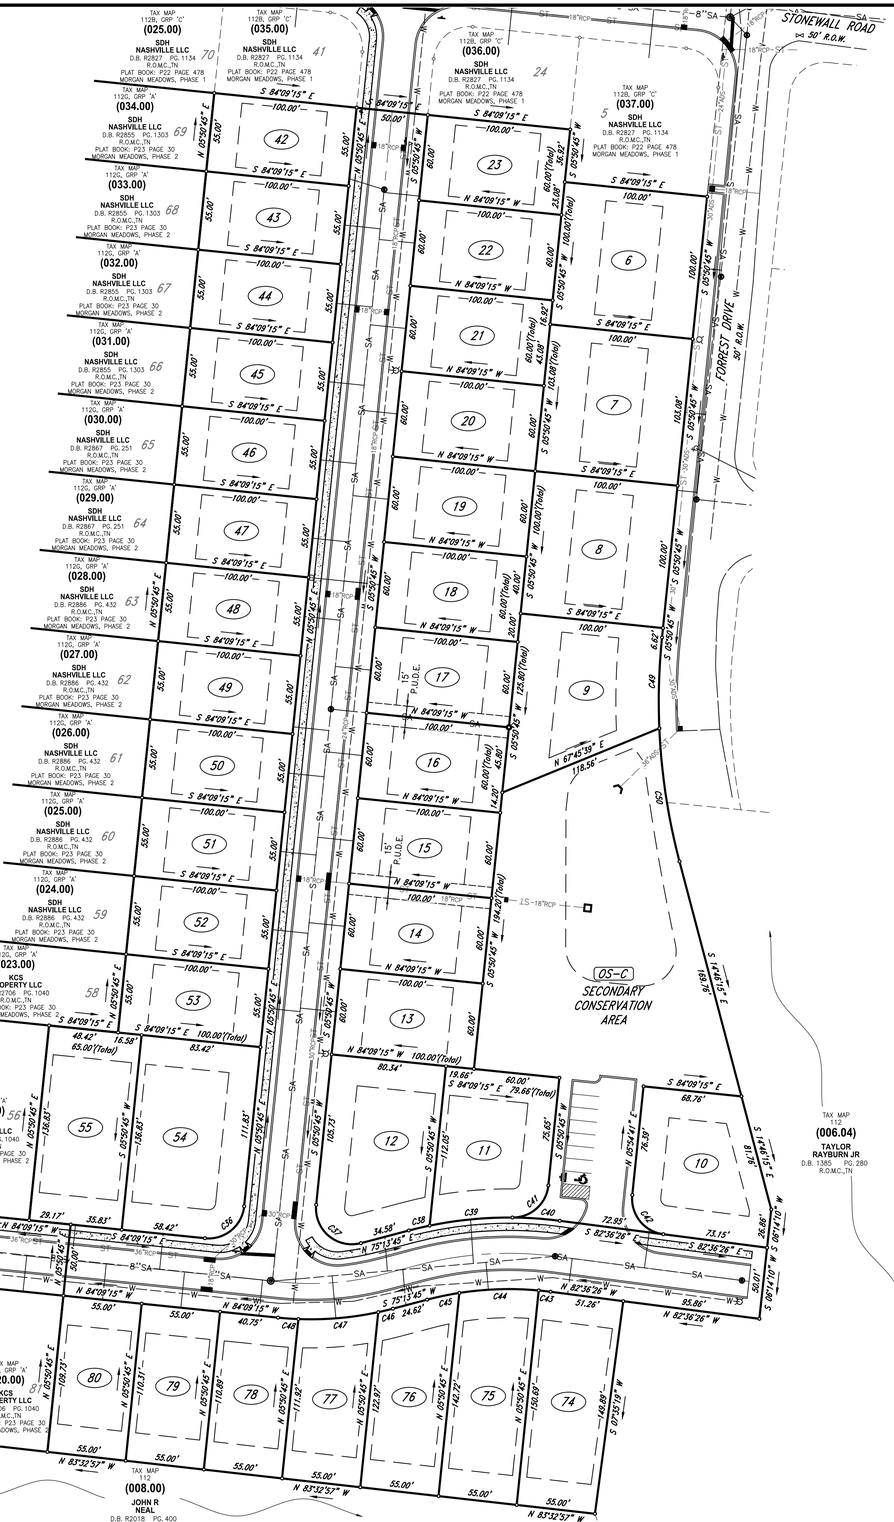
The DEVELOPER agrees the DEVELOPER shall have no claim, direct or implied, in the title or ownership of the IMPROVEMENTS specified in this agreement when the IMPROVEMENTS are complete and thereafter accepted by the CITY. The DEVELOPER will be responsible for construction failures and defects in PROJECT prior to final acceptance. During this period, it shall remain the responsibility of the DEVELOPER to correct and cure these defects and failures.

B4.2 As-Built Drawings and Post-Completion Items

The DEVELOPER agrees to furnish to the CITY as-built plans, on a reproducible, stable media, of the sanitary sewer, storm water management, water mains and service system, and streets within the subdivision before the CITY shall accept the subdivision.

B4.3 Acceptance of Facilities

Upon final acceptance of all or part of the IMPROVEMENTS in the PROJECT, then those IMPROVEMENTS shall become the property of the CITY free from all claims from any person or entity without the necessity of any further writing, agreement, or deed. The DEVELOPER further agrees that any facilities placed within a public or platted right-of-way or dedicated public easement are irrevocably dedicated to the public use without any right of reimbursement or compensation of any kind.



B4.4 Failure to Install

In the event the DEVELOPER fails to install the facilities in accordance with the terms of this agreement, the CITY may, in its sole discretion, elect to accept all or a portion of the IMPROVEMENTS in the PROJECT. Should the CITY choose to accept all or a portion of these IMPROVEMENTS, the CITY shall become the sole owner of these facilities. The CITY may give notice of acceptance by writing delivered to the DEVELOPER or recorded in the Register's Office of Maury County, Tennessee. No further writing or deed shall be required.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed in multiple originals by persons properly authorized so, to do on or as of the day and year first given.

McNabb Auto Dealership Exception Request

The applicant requests an appeal to the City Engineer's ruling of an exception to the Access Management Ordinance. The proposal is for an auto dealership on the southeast corner of Nashville Highway and Baker Road intersection. Nashville Highway is a principal arterial classification and Baker Road is a collector classification.

The proposal is not compliant with the following regulations of the Access Management Ordinance:

Number of Access Points
The applicant has requested three (3) access points. The Access Management Ordinance allows for two (2) access points for non-residential developments of this size. The Access Management Ordinance provides a means to allow for more than the allowed access points if a traffic study is performed and demonstrates the need for the additional access points to provide for the anticipated traffic volumes and meets all other requirements. The traffic impact study proposes two access points, one access point on Nashville Highway and one access point on Baker Road.

Driveway Spacing
The proposed driveways do not meet the requirements for driveway spacing in the Access Management Ordinance. Driveway spacing on Nashville Highway is required to be four-hundred-forty (440) feet and two-hundred-twenty (220) on Baker Road. The driveway spacing for the proposal is roughly:

- 205 ft. for access on Nashville Hwy (from Northside Medical Plaza)
- 175 ft. for the eastern access on Baker Rd (from proposed access point)

Corner Clearance
The proposed driveways do not meet the requirements for corner clearance in the Access Management Ordinance.

- 395 ft. for the access on Nashville Hwy (440 ft. required)
- 190 ft. for the western access on Baker Rd. (220 ft. required)

Access of Lesser Classified Street
When a development abuts more than one public street, access shall be provided from the lesser (lowest classification) street. Access to each abutting street may be allowed only if the following criteria are met:

1. It is demonstrated that such access is required to adequately serve driveway volumes and will not be detrimental or unsafe to traffic operations on public streets. The City Engineer may require the submittal of a traffic study which demonstrates that such access is required; and
2. The minimum requirements for the corner clearance are met.

The traffic study does address the access point on Nashville Hwy (right-in, right-out) with closure of a median on Nashville Hwy. The City's traffic consultant states the following in their review of the Traffic Impact Study:

> *We advise that the project's right-in/right-out driveway on Nashville Hwy will be required to meet City of Columbia access management design guidelines. The project's preliminary site plan indicates that Driveway B will be located generally near the site's southern*

property limits. A driveway serving an existing medical building is located near the same property line. As a result, project planners should coordinate with city staff to finalize access management requirements related to proposed Driveway B. We assess that the following stipulations will need to be met to satisfy city access management ordinance requirements: the two existing median openings on Nashville Hwy between Burt Dr and Columbia Rock Rd should be closed, and a cross-access agreement between the existing medical office and the proposed dealership providing a shared driveway connection to Nashville Hwy site will be needed.

Cross Access
Accesses shall be designed and constructed so as to align with driveways or streets on the opposite side of the street. The alignment of through movements crossing the highway shall be such that abrupt shifts in the travel pattern are not required.

A. Adjacent commercial or office properties classified as major traffic generators (retail strip centers, office parks, or multi-family residential complexes adjacent to other multi-family residential, commercial and office properties) shall provide a cross access drive and pedestrian access to allow circulation between sites.

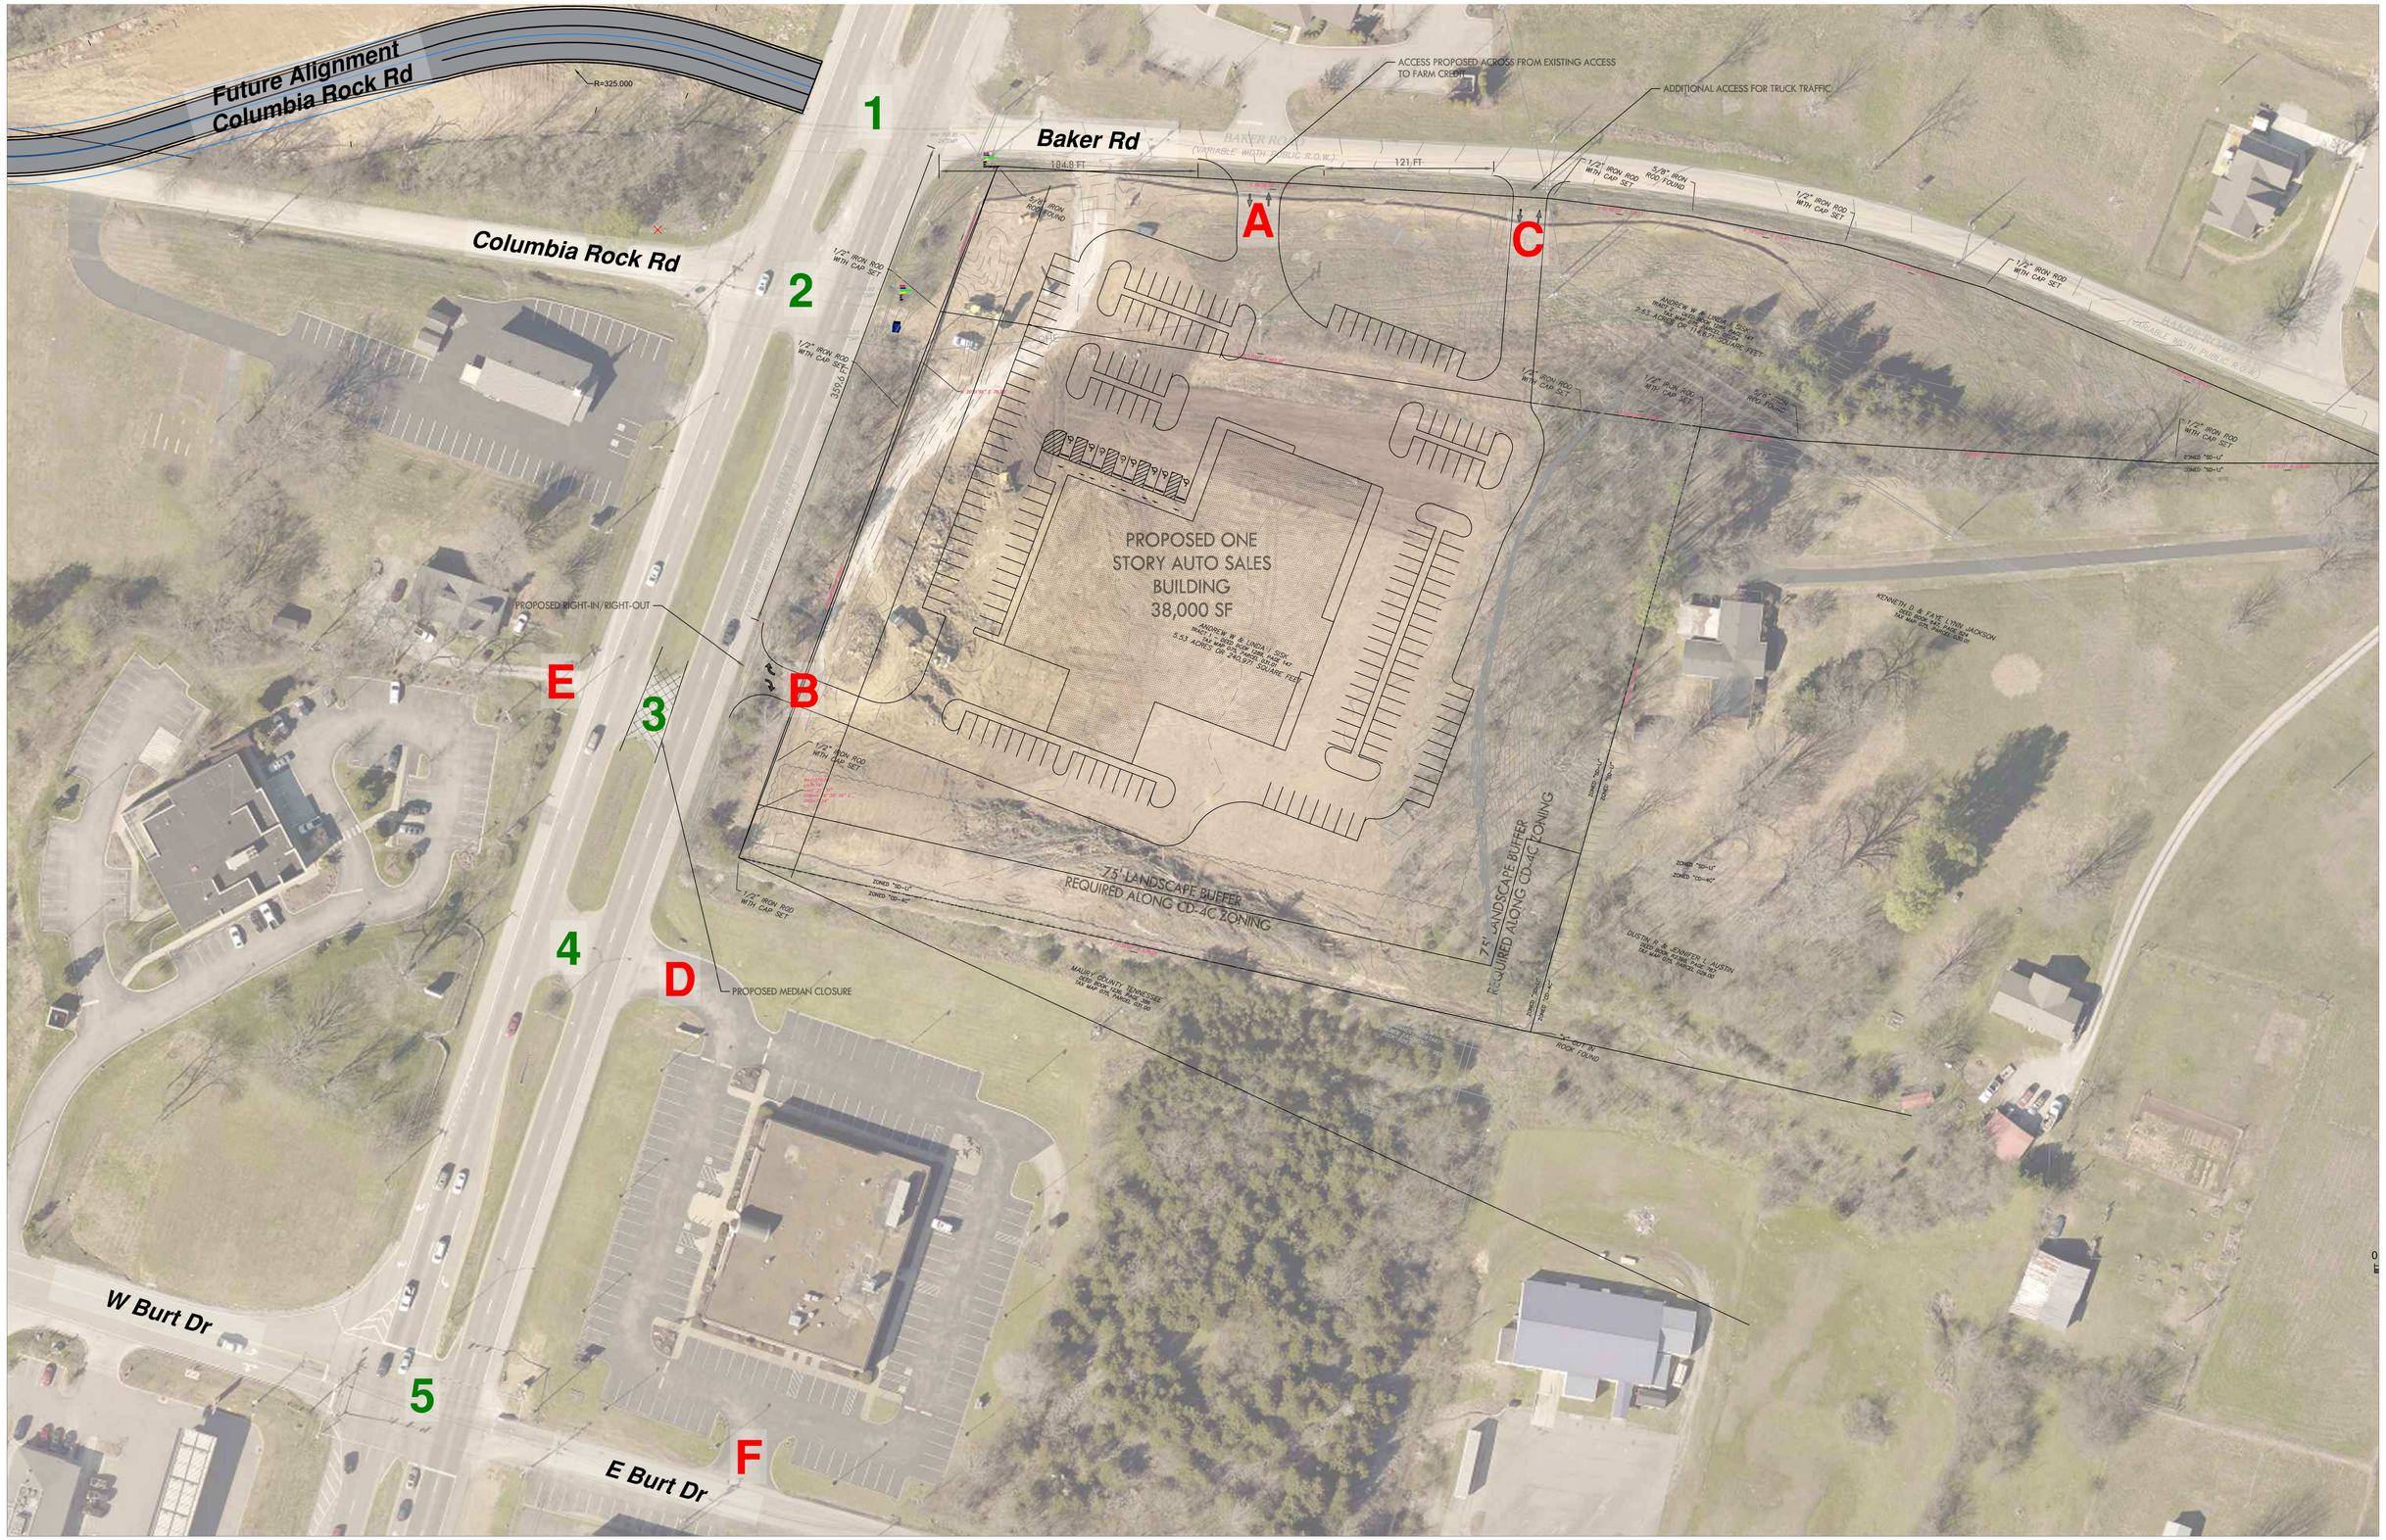
As stated by the Applicant, Northside Medical Center has no interest in sharing an access to their property. However, the Access Management Ordinance requires that cross access be granted even if it is not utilized at this time.

TDOT Review
All improvement on Nashville Highway are subject to TDOT review and approval. It is the City's understanding that TDOT will not allow median closures as part of their highway access permits unless all parties with an interest in the existing median opening provide permission. Without closure of the median, the proposed access on Nashville Highway will not meet TDOT or City standards and will create conflict points and safety concerns.

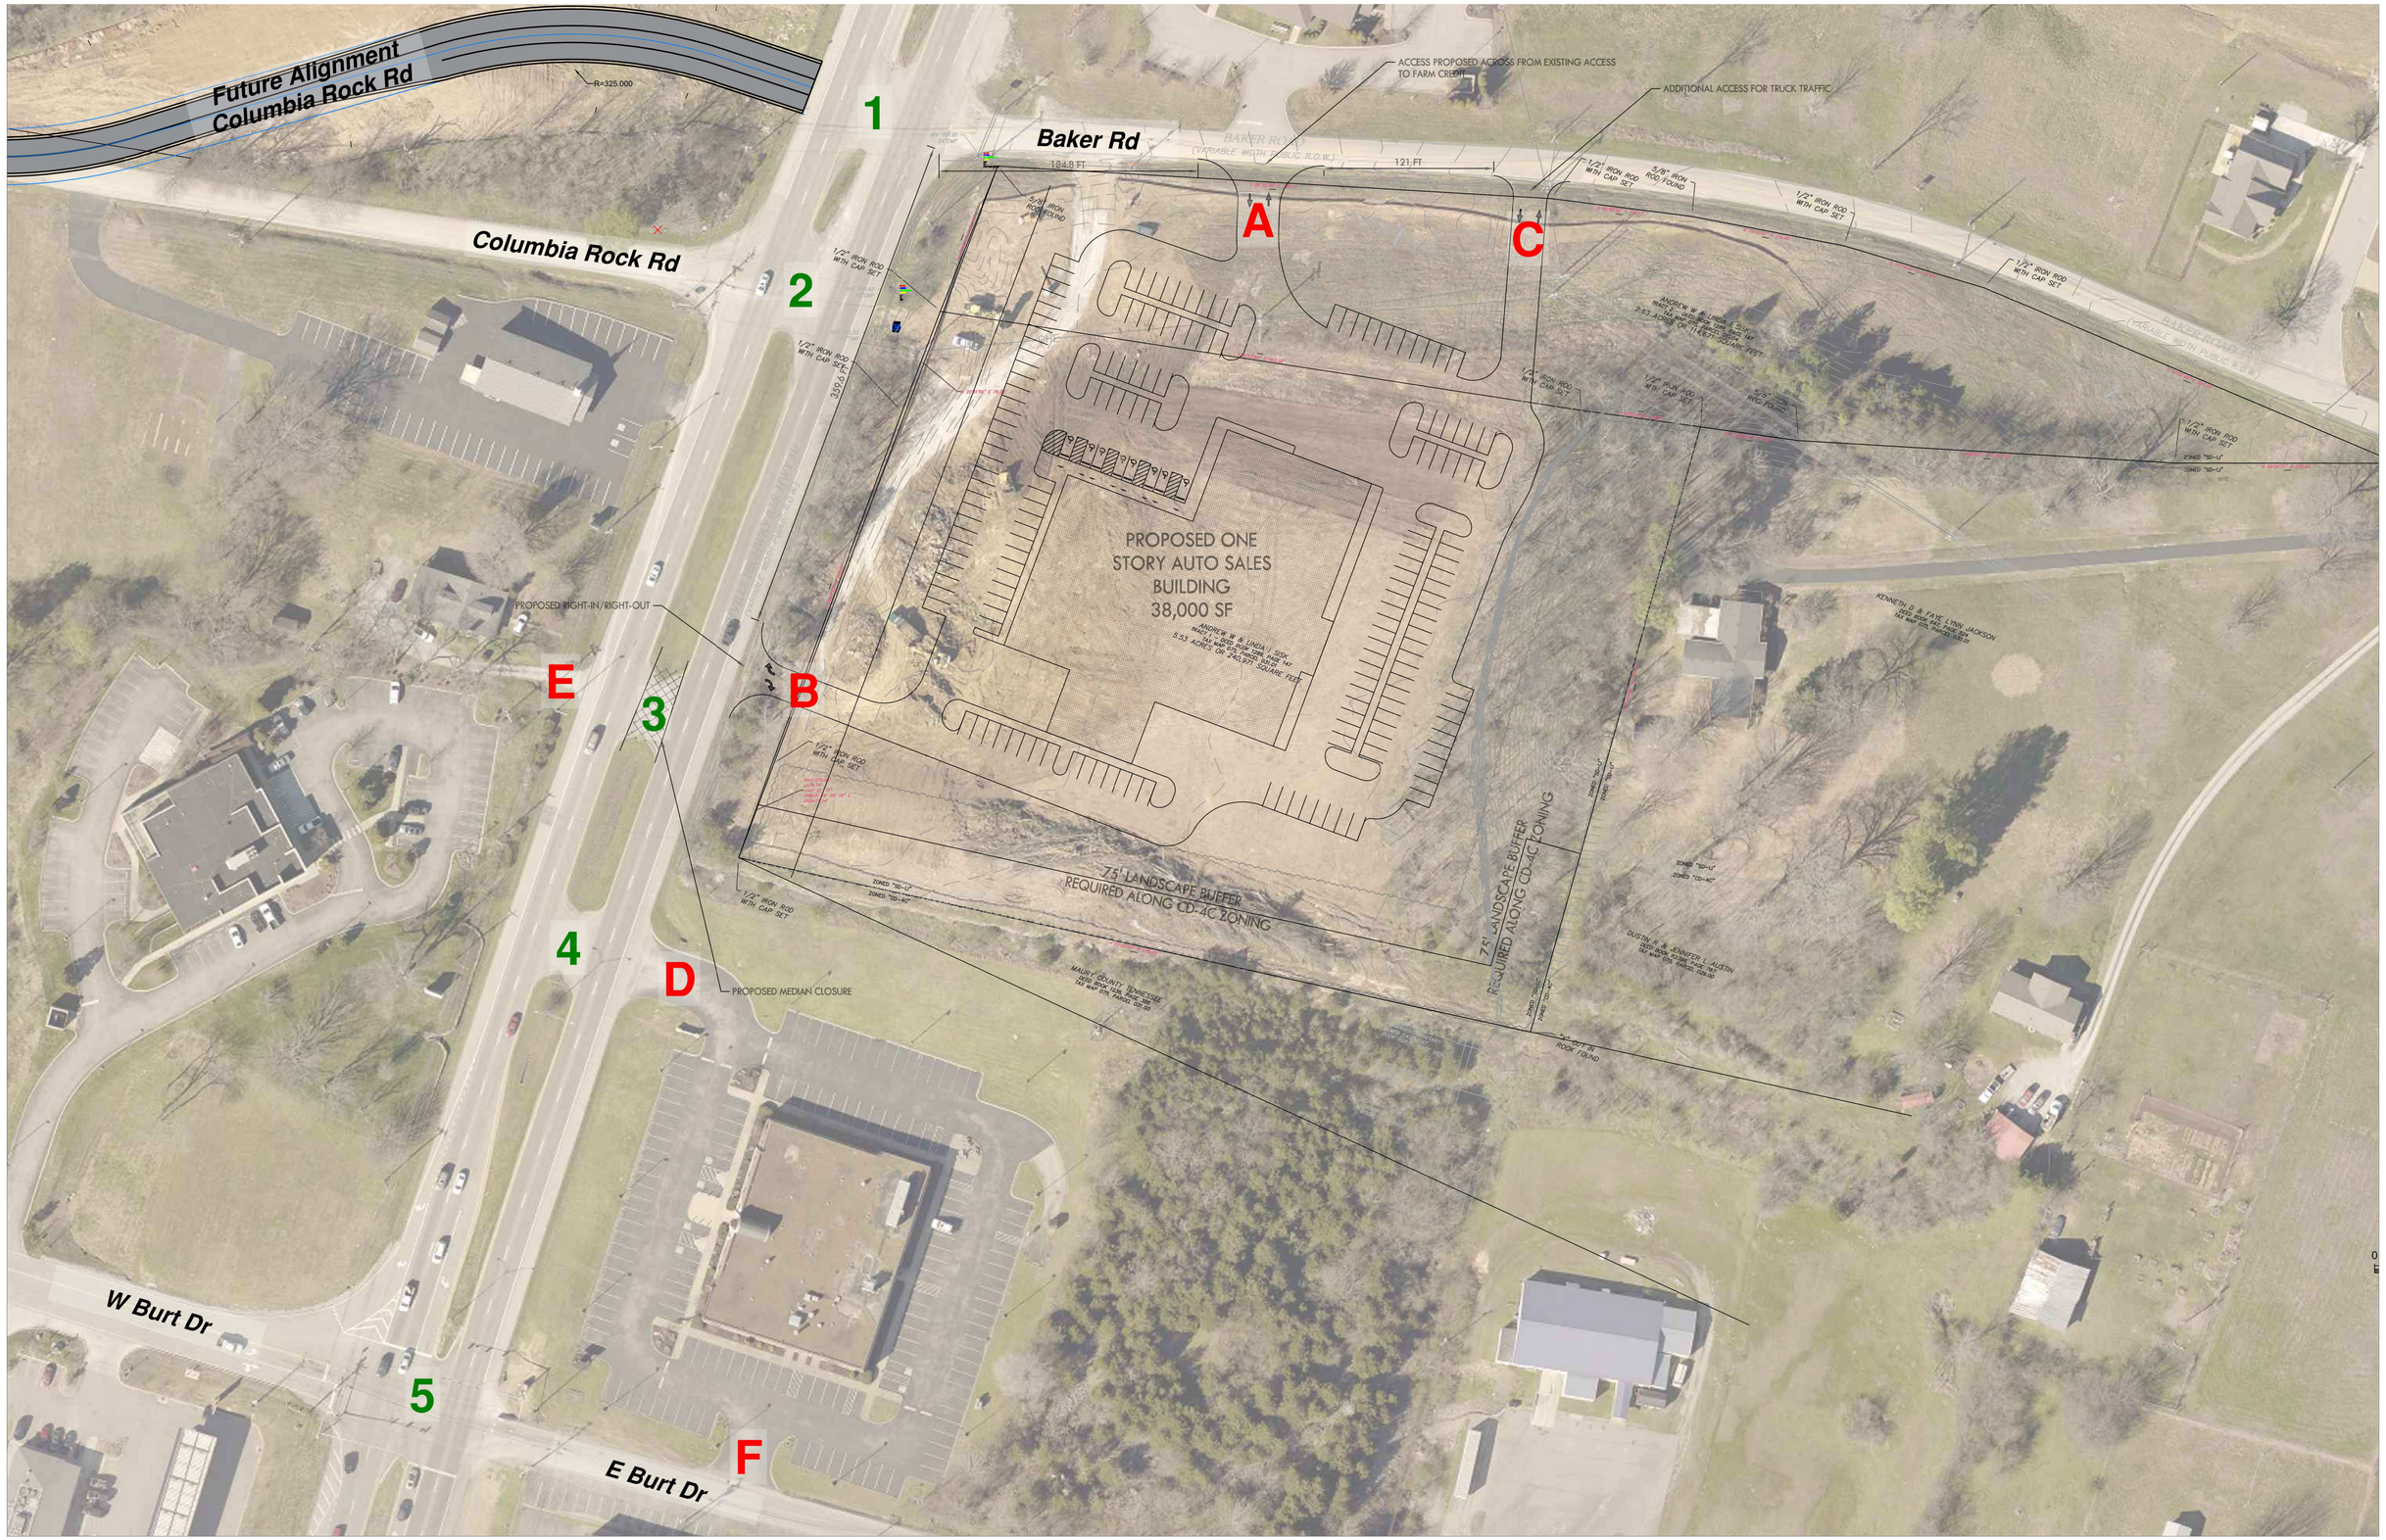
City Engineer's Ruling
The response to the requests for exceptions to the Access Management Ordinance are as follows:

The first access point along Baker Rd (western access) can be supported based upon its alignment with an existing driveway (Farm Credit), with appropriate roadway improvements.

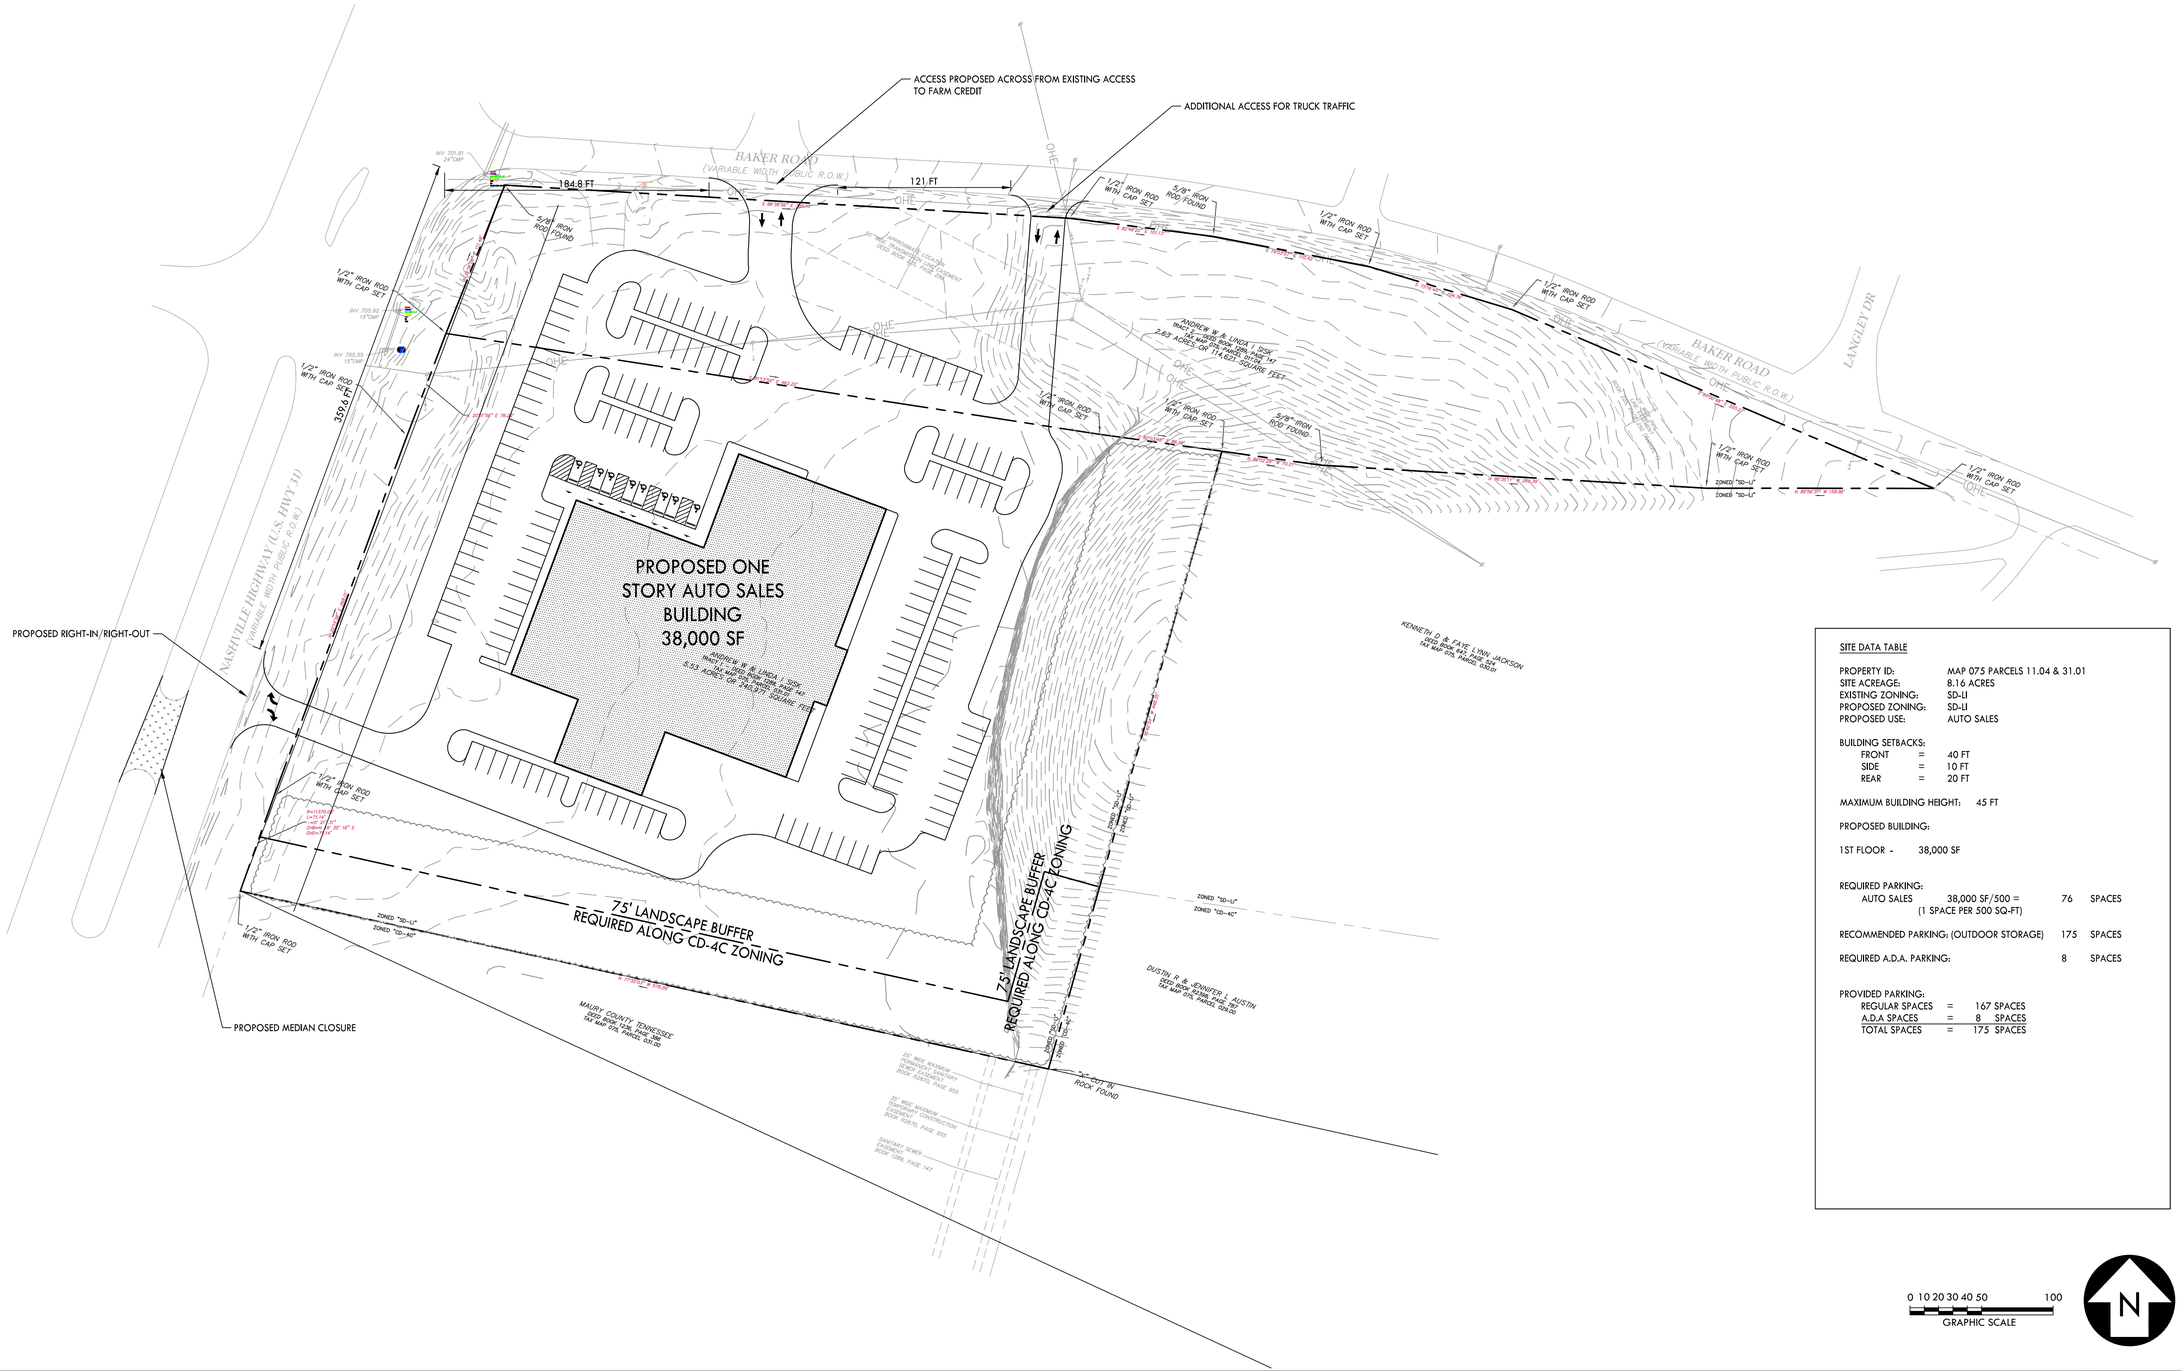
The second access point along Baker Rd (eastern access) could potentially be supported with appropriate roadway improvements and a site distance analysis.



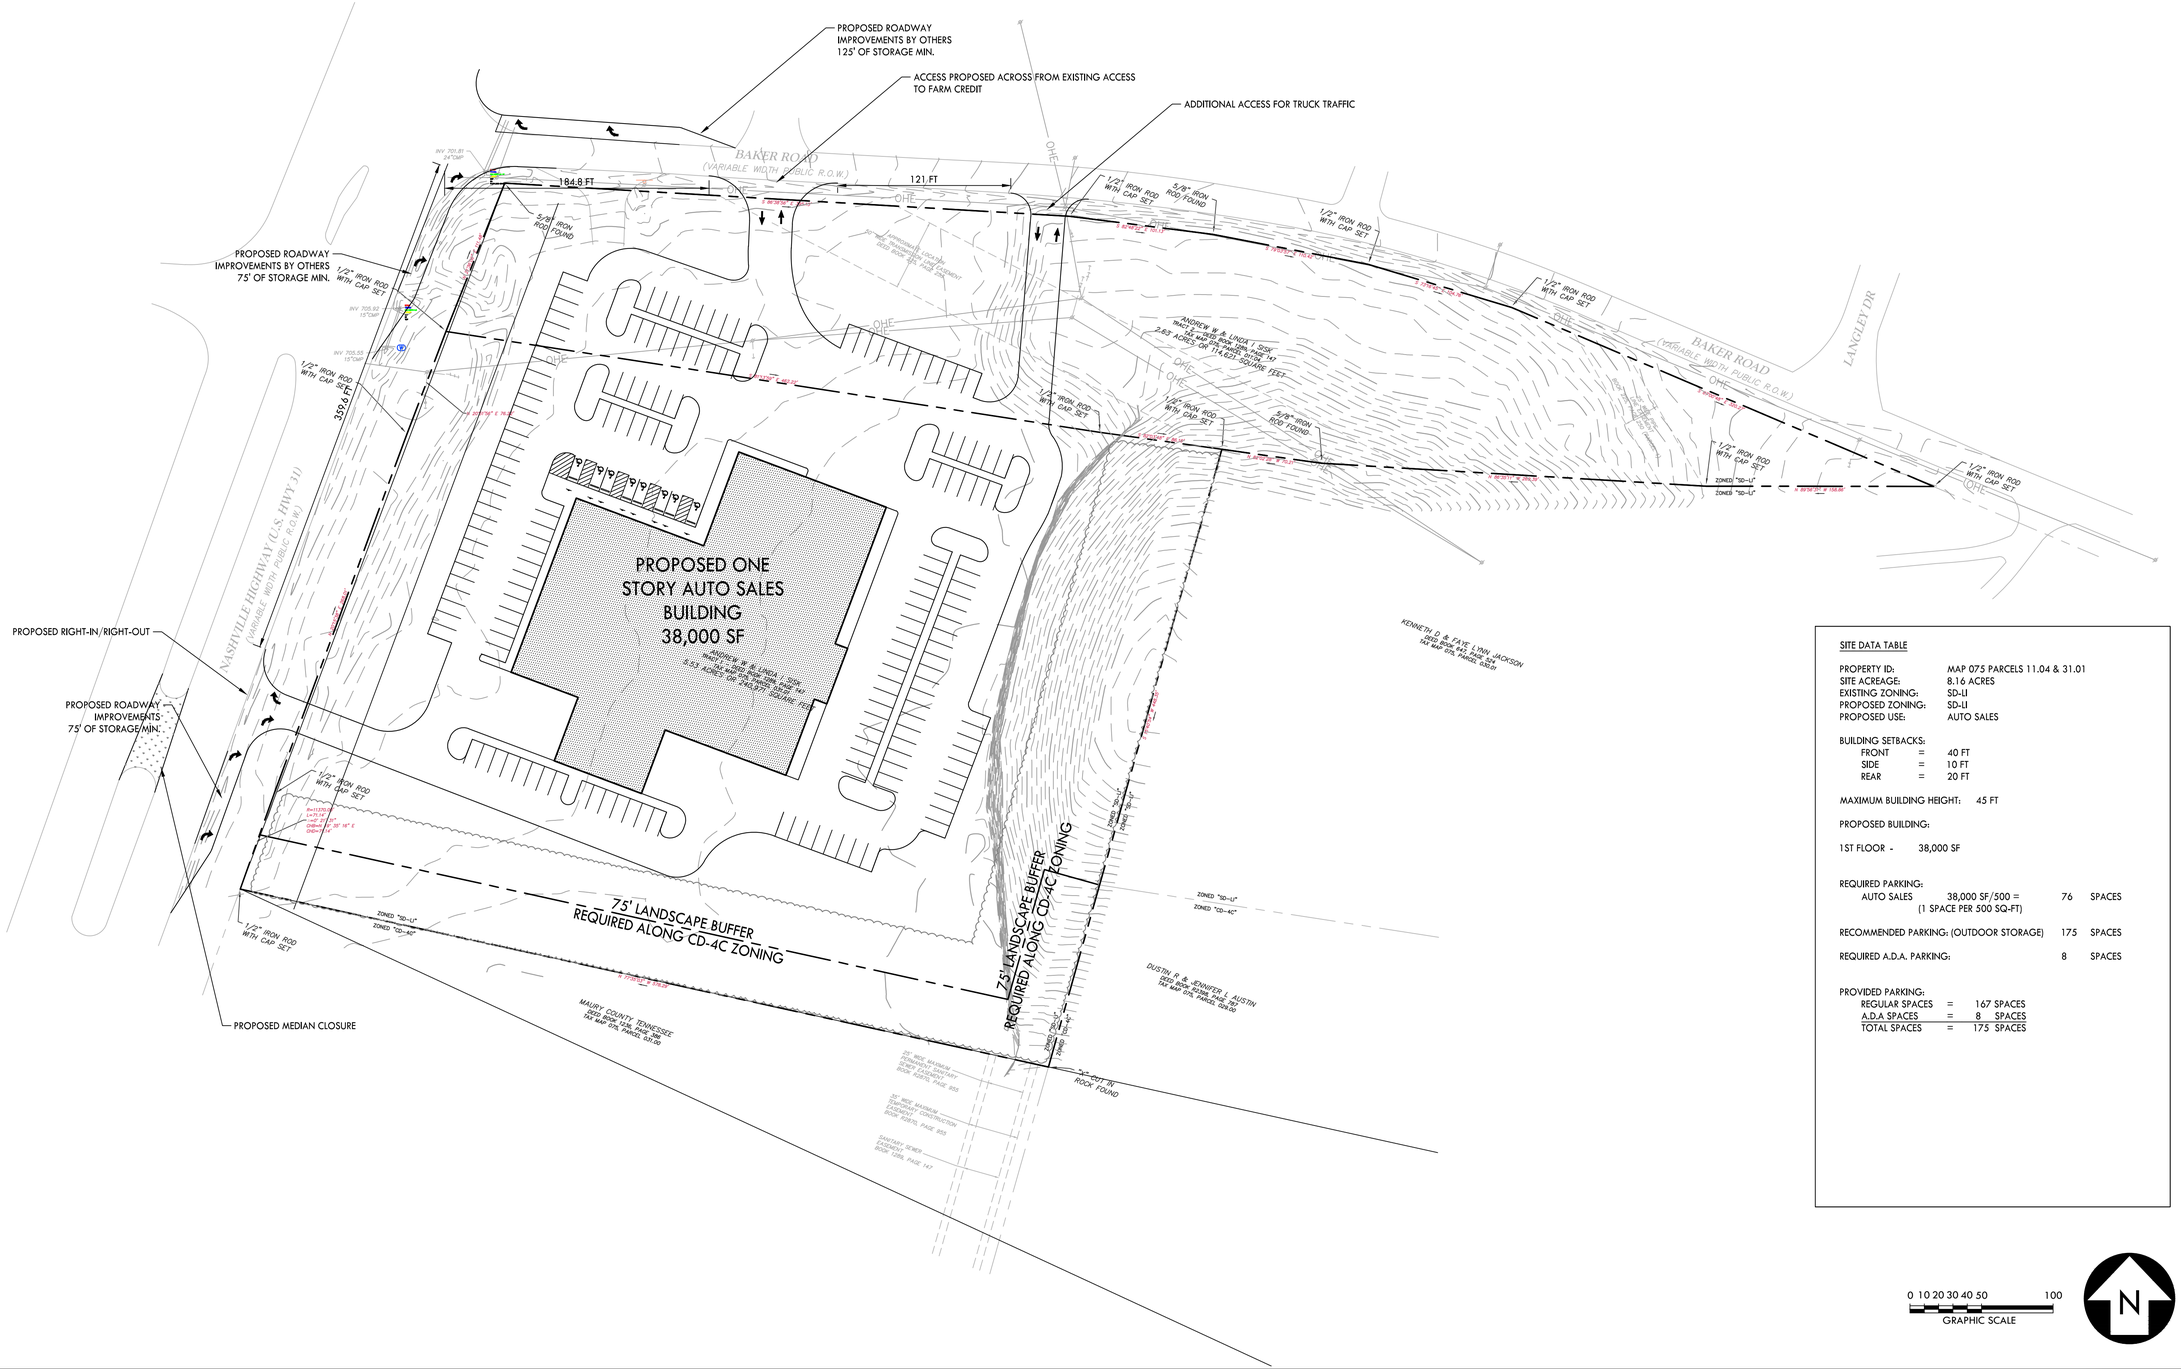
The access point on Nashville Highway cannot be supported due to the requirements for driveway separation and proximity to the existing median opening. Driveway separation and number of access points on major corridors directly correlates to higher traffic congestion and decreased safety.



The access point on Nashville Highway could be supported if the two existing median openings on Nashville Hwy between Burt Dr and Columbia Rock Rd are closed, and a cross-access agreement with a shared driveway between the Northside Medical Center and the proposed dealership is provided.



Review Criteria



Each item listed below shall be considered and deemed satisfied by the Planning Commission prior to the approval of an Exception:

1. The strict application of this Ordinance would result in practical difficulties to or undue hardship on the owner of the property.
2. The situation is not self-created.
3. The Exception may be granted without substantial detriment to the public good and without sustainably impairing the intent and purpose of this Ordinance.

McNabb Auto Dealership
Nashville Hwy & Baker Rd Intersection
Access Exception Request

To Whom It May Concern,

With the proposed 38,000 sf auto dealership located at the southeast quadrant of the Nashville Highway & Baker Rd intersection, the applicant is requesting 3 points of access to the property.

- A new right-in-right-out is proposed on Nashville Highway to assist with traffic turning into the property.
- A new full access on Baker Rd across from the existing entrance to the Farm Credit building.
- A new full access on Baker Rd further east than the aforementioned access point to assist with truck access.

As an auto sales dealership, providing adequate truck maneuvering from the public right-of-way to the property is crucial in delivering automobile inventory. Those deliveries are anticipated to be predominantly made from northbound Nashville Highway traffic. Having a right-in/right-out along Nashville Highway and a second eastern entry along Baker Road will make the ingress and egress much more efficient and safer for large scale vehicles. Allowing these access points will also limit the truck conflict at the Baker Rd and Nashville Highway intersection.

We are requesting an exception to the driveway distance requirement along Baker Road from the Nashville Highway intersection so that the western proposed access can line up with the nearby existing access to the Farm Credit building to the north. We feel that lining these entrances up would produce a safer design than having entrances staggered from each other at the prescribed distance from Nashville Highway.

Not having access to Nashville Highway would be an undue hardship due to the nature of the business being proposed. The auto dealership brand requires access to the property from the front of the building, which in this case will be Nashville Highway. If access was limited to Baker Road, truck turning within the site would be limited given the close proximity of the access points proposed along Baker Road. There is significant topography and existing electric lines that make access difficult further east down Baker Road.

We believe that these requests have not been self created, and that granting access would not be detrimental to life, safety, and public welfare.

SUMMARY OF REQUEST: **Preliminary Plat**

Following the February Planning Commission meeting, the applicant met with Development Services staff and resubmitted a revised Preliminary Plat limited to Phases 1 and 2.

The submittal outside of the normal Development Review Committee cycle required additional technical review and an update to the staff analysis.

Development of the property is controlled by a Planned Unit Development Master Plan which allows a mix of townhomes and single-family lots. The Master Plan also includes a commercial parcel fronting Nashville Highway. Phase I consists of 70 single family lots; Phase 2 consists of 112 townhomes.

City Council approved the preliminary Master Plan in October 2021. Planning Commission approved the Final Master Plan (22-0106) and a Preliminary Plat for Phase 1 in July 2022.

CONFORMITY to the ZONING ORDINANCE:

This preliminary plat request is subject to the standards of Zoning Ordinance 3638 (§§ 6.3.8; 7.3; and 8.3.2.J) and the Subdivision Regulations. Specifically, the development and proposed lots must conform to the base standards for development in an RS-6 (Single Family Medium-High Residential) as modified by the Preliminary Planned Unit Development Master Plan.

On January 10th, staff provided technical comments which noted, among other things, that setbacks, landscape buffers, and pump station locations, did not conform to the standards of the Zoning Ordinance or Preliminary PUD Master Plan.

On January 17th, the applicant resubmitted a revised Preliminary Plat. The revision continued to depict deviations from the Master Plan.

On February 8th, the Planning Commission deferred action on the item. On February 13th, the applicant submitted a revised Preliminary Plat for Phases 1 and 2. The revision addresses most technical comments but continues to depict deviations from the Master Plan, including:

- The Landscape opacity between the two phases is depicted as 20% opacity, not 40% as required by the Master Plan. Various buffers within the development have differing opacity requirements. This may be causing confusion.
- The townhome typical layout does not depict the 25' rear setback.

On February 15th, staff from Wastewater and Development Services met with the applicant to discuss further revisions to the Preliminary Plat.

This version of the Preliminary Plat for Phases 1 and 2 has been reviewed outside of the normal cycle for technical review. Approval should be subject to outstanding technical comments.

Planning Commission recommended approval in August 2021 (Planning Case #21-0100). City Council approved the preliminary Master Plan in October 2021.

  - The location of the access easement has moved (moved from lots 85/84 to lots 83/83);
  - A pump station location has been added; and
  - A new access driveway has been added.

- Shifting of phase lines has changed the amount of open space in Phase 1.
- Setbacks throughout the phases do not conform to the Master Plan.

It is within the discretion of the Zoning Administrator to approve "minor extensions, alterations, and modifications" under § 3.20.17.B of Ordinance 3638. Planning Commission may determine whether, taken together, the addition of the pump station and other deviations from the Master Plan qualify as minor alterations. Planning Commission may direct the applicant to correct these issues and resubmit for review by the Development Review Committee. Alternatively, the applicant may request to modify the Master Plan, which will require conformity to the PUD-R standards of Ordinance 4400. Approval should be subject to outstanding technical comments.

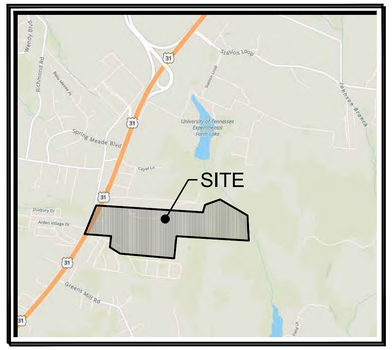
To whom it may concern, per our discussion with Paul Keltner on 2/8/2023 at the planning commission meeting. We are resubmitting Phases 1 & 2. We intend to submit Phase 3 & 4 at a later date once we have force main issues resolved. We have a meeting scheduled with Paul Keltner, the city engineer, and all parties involved for 2/15/2023. This meeting we will discuss our options for Phases 3 &4.



This re-submittal dated 2/13/2023 is addressing review comments for Phases 1 & 2 and ask the planning commission to only review these phases at this time.

STORMWATER NARRATIVE

EXISTING SITE CONDITIONS

The existing 101-acre site is undeveloped with two single family residential homes and farmland. The site surface drains to five (5) POI (points of interest). POI 1 is located at the Southwest corner of the property and discharges offsite to a drainage ditch along Nashville Highway. This drainage is conveyed to an unknown tributary of Rutherford Creek. POI 2 is located at the existing Pond 1 and discharges offsite to an existing residential subdivision. This drainage is conveyed to a detention pond in the residential subdivision via storm sewer and then discharged to an unknown tributary of Rutherford Creek. POI 3 is located where the downstream natural channel from Wetland 1 intersects the property boundary. This drainage is conveyed by natural channel to an unknown tributary of Rutherford Creek. POI 4 is located near the Southeast property corner downstream from existing Pond 2. This drainage discharges directly to an unknown tributary of Rutherford Creek. POI 5 is located on the North property boundary and discharges offsite to a natural channel. This drainage is conveyed via natural channel to an unknown tributary of Rutherford Creek. See Existing Drainage Map in **APPENDIX B**.

The existing soil conditions according to the USDA web soil survey indicate the property is located in the soil group A, B, C, and D. Soils belonging to soil group A include Maury Silt Loam (Mb) and Maury Silt Clay (Me). Soils belonging to soil group B include Armour Silty Clay Loam (Ah), Huntington Silt Loam depressional (Hp & Hr), and Lindell Silt Loam (Lc & Ld). Soils belonging to soil group C include Braxton Cherty Silty Clay (Bf), Braxton Cherty Silty Clay (Bg), Braxton Silt Loam (Bh), Braxton Silty Clay Loam (Bk & Bl), and Gullied land (Gd). Soils belonging to soil group D include Gladedville-Rock Outcrop Complex (Rb) and Rockland (Rc). A copy of the USDA web soil survey is included in this report. No portion of this property lies within the flood plain according to firm community panel number 47119C0180E dated 4/16/2007. There are no state waters onsite, nor within 200' of the site.

PROPOSED DEVELOPMENT

Of the existing 101-acres, 90 acres will be developed for residential and commercial use. This will include single family homes, townhomes, roadway, sidewalks, amenities areas, retaining walls, storm sewer, utilities, and stormwater management areas.

Most onsite drainage will be conveyed via storm sewer to an extended detention pond where it will be attenuated and treated for water quality before being discharged offsite. All other drainage with overland flow offsite. See Post Developed Drainage Map in **APPENDIX B**.

STORMWATER QUANTITY

Proposed extended detention ponds with **Flood Con** outlet structures will be used to attenuate post development drainage runoff so that post development peak flow rates will be less than or equal to pre development peak flow rates at all POIs during the 2-Yr, 5-Yr, 10-Yr, 25-Yr, 50-Yr, and 100-Yr 24-Hour rainfall events. Furthermore, the extended detention ponds and **Flood Con** outlet structures have been designed to provide at least 1-foot of freeboard during the 100-Yr, 24-Hour rainfall event. Rainfall depth data from the City of Columbia Stormwater Management Plan Guide was used. Extended detention ponds were designed in accordance with city of Columbia stormwater regulations. See **Flood Con** stormwater quantity calculations in **APPENDIX C.**

The Tennessee Department of Transportation (TDOT) requires that the 50-Yr 24-Hour runoff draining to the TDOT R.O.W. will maintain post development peak flows less than or equal to pre development peak flows. The proposed drainage layout has been designed to meet this requirement by capturing most of the onsite impervious. Hydrograph calculations are provided in **Appendix C**. Furthermore, the undeveloped proposed commercial lots will maintain the land use of the existing site condition. When owners of the commercial lots choose to develop their properties, they will be required to provide individual detention to reduce or maintain peak flows from their lots in the post development condition below pre development conditions in accordance with the city of Columbia stormwater regulations.

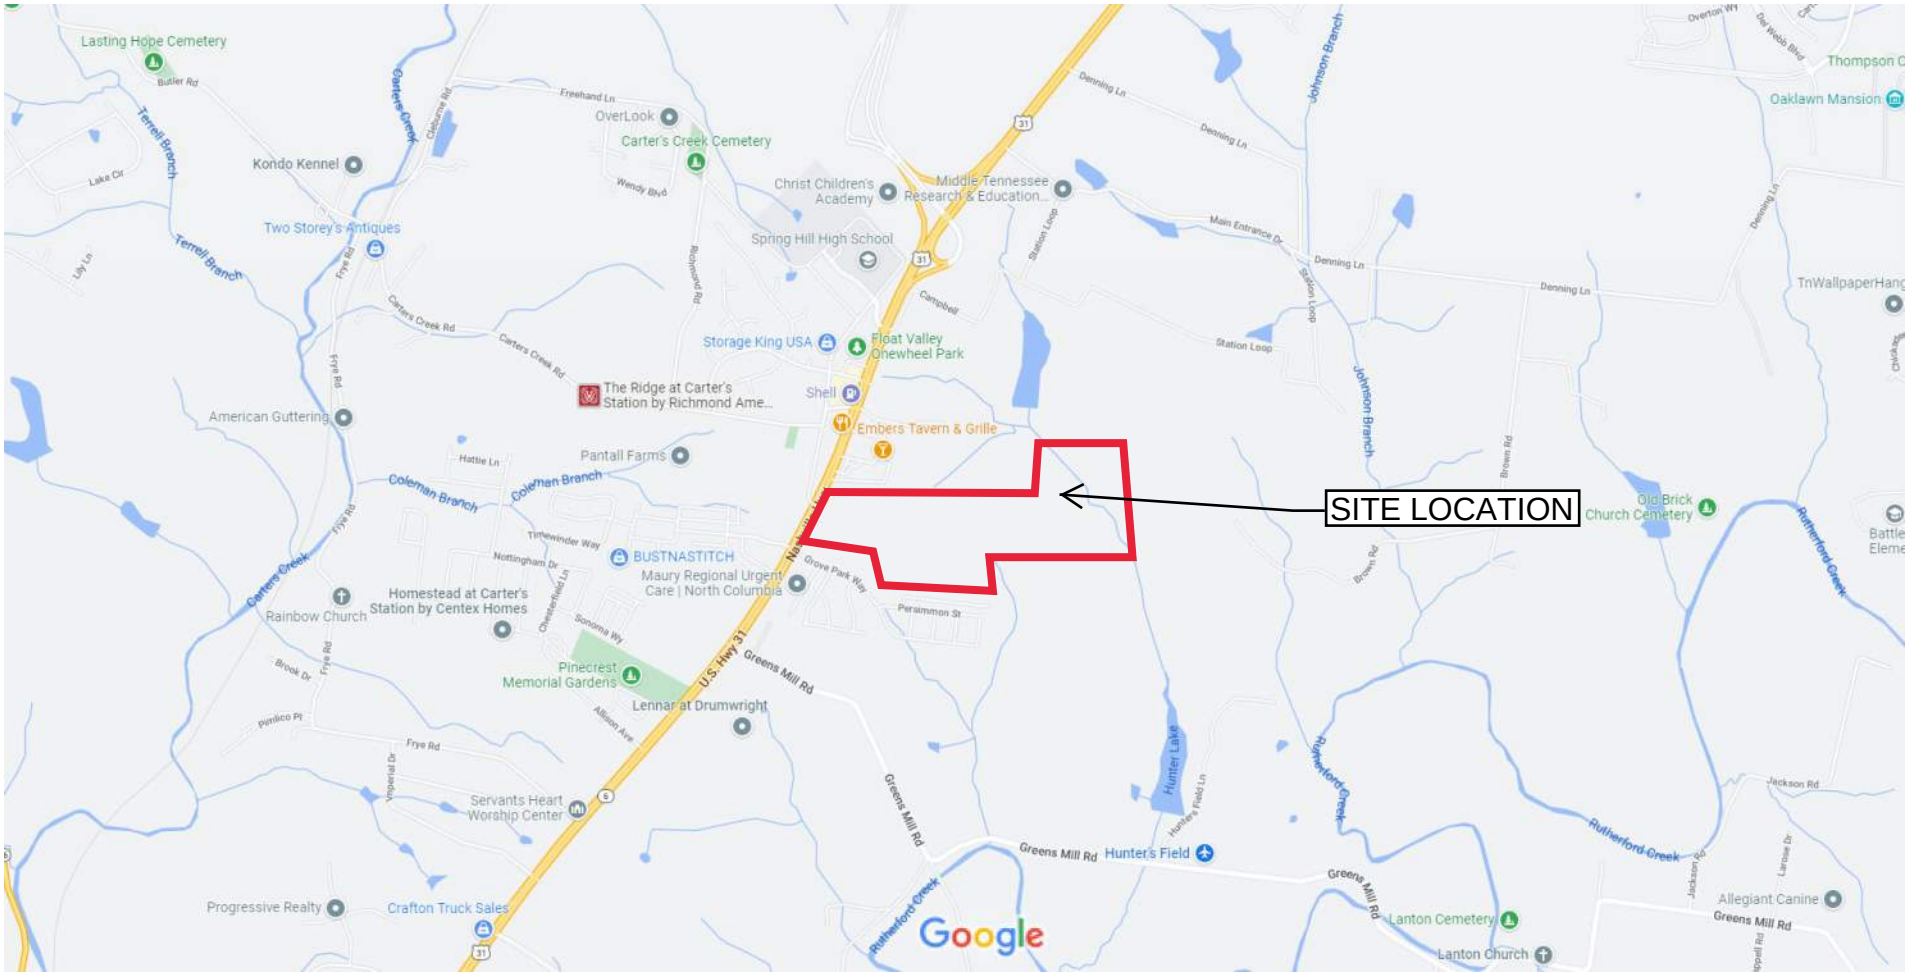
STORMWATER QUALITY

Extended detention ponds will be used to provide water quality treatment for the site. The required water quality volume to be treated was determined from the 2.5-inch rainfall event and Soil Conservation Service (SCS) rainfall runoff equation. The extended detention ponds have been designed using **Flood Con** outlet structures to detain the water quality volume for 24 hours in accordance with the Tennessee Permanent Stormwater Management Manual.

CN = Curve Number
S = Potential Maximum Retention (inches)
P = Precipitation (inches)
Q = Rainfall Runoff Depth (inches)
DA = Drainage Area (acres)
Tv = Required Treatment Volume (cubic feet)
Fv = Required Forebay Volume (cubic feet)

$S = (1000 / CN) – 10$
$Q = (P – 0.2S)^2 / (P + 0.8S)$
$Tv = Q*DA$
$Fv = 0.15Tv$

See water quality calculations in **APPENDIX C**.



STORM SEWER, DRAINAGE DITCH, AND LEVEL SPREADER DESIGN

Proposed storm sewer and drainage ditches have been designed with the manning's capacity to convey the design peak flow during 25-Yr rainfall event in accordance with city of Columbia stormwater regulations. The level spreader was designed for the 25-Yr rainfall event in accordance with the *Tennessee Erosion & Sediment Control Handbook*. The rational method was used to determine design peak flow rates during the 25-Yr rainfall event. Storm sewer was designed using the design software Hydraflow Storm Sewers. Drainage ditches were designed using the design software Hyrdraflow Express. Rainfall intensity data from the City of Columbia Stormwater Management Plan Guide was used. See storm sewer, drainage ditch, and level spreader calculations in **APPENDIX E**.

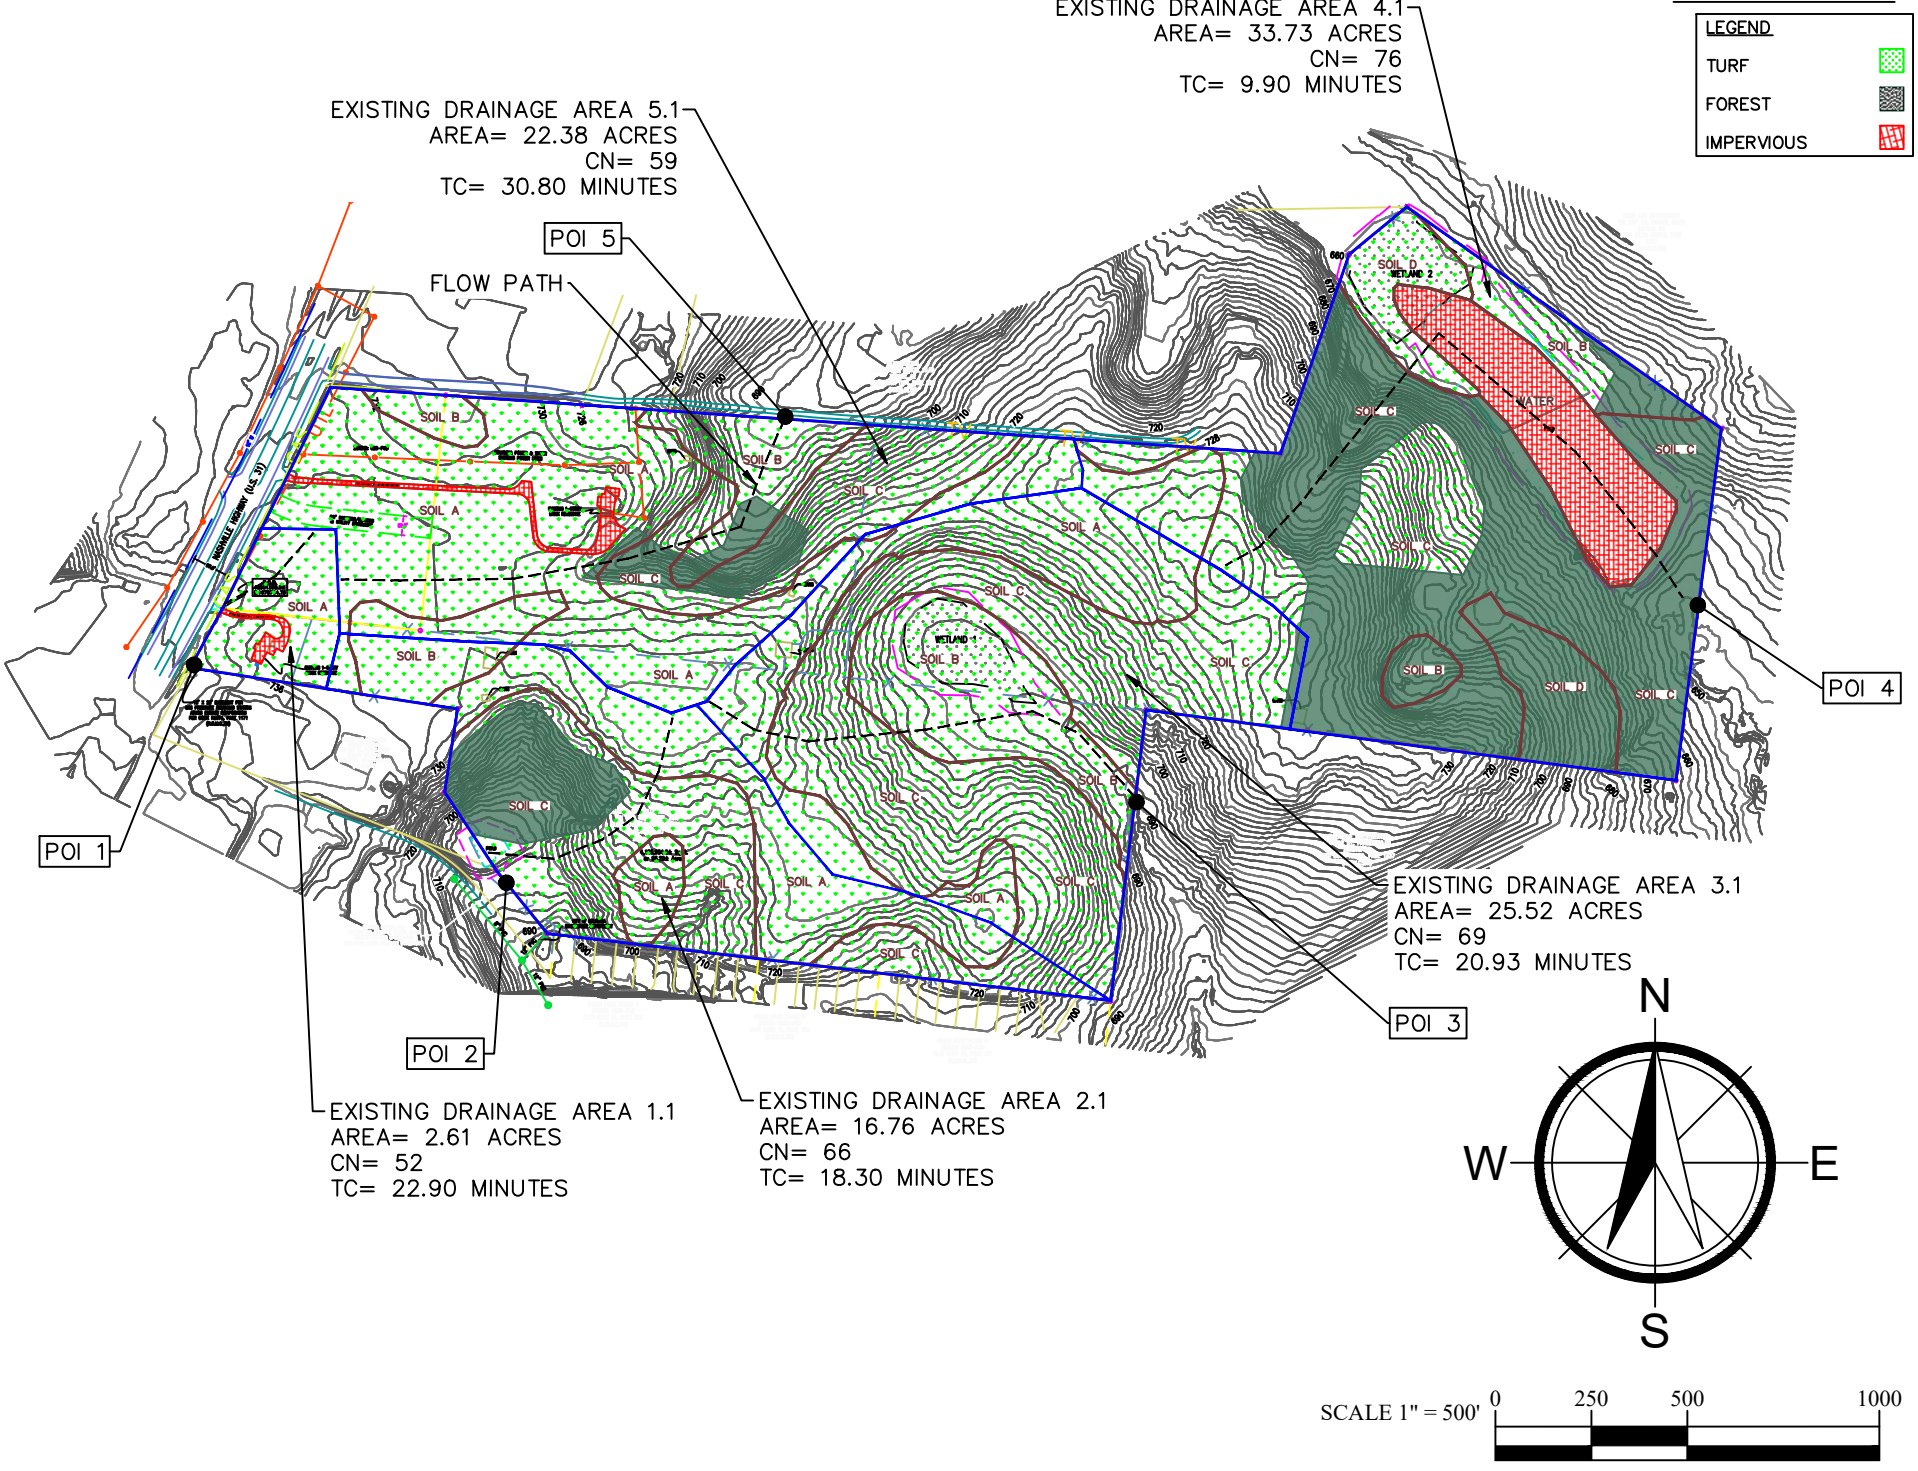
Supplemental Narrative

The purpose of this supplemental stormwater management report is to provide an automated outlet control structure (AOS) device to provide controlled release from four (4) proposed at grade detention ponds. Also included in this report is the pond storage volume that is required by the AOS device based on the proposed improvements. The AOS is designed to provide a slow extended release of the required water quality volume based on the 2.5" rainfall and attenuate the proposed development peak flow rates for the 2, 5, 10, 25, 50, and 100yr 24-hour design storm events per the City of Columbia current stormwater regulations.

The AOS device is designed based on the following information provided by W&A Engineering and are included in this report for reference:

1. Pre and post curve number calculations.
2. Pre and post drainage area maps with time of concentrations for each sub-area.
3. Pond stage-storage tables.



Flood-Con, LLC incorporated the provided information to size the AOS device and the required volume of the proposed at grade detention facilities. Pre-development and post development hydrology data was taken from the information provided to size the AOS and pond volume.

Flood-Con, LLC has provided W&A Engineering, Inc. the following:

1. Signed/sealed AOS detail sheets.
2. Signed/sealed Supplemental Stormwater Management Report.
3. Attenuation: AOS pond outflow hydrographs for the 2, 10, 25, 50 and 100yr storm events.
4. Water Quality: Slow release of the required 2.5" water quality volume for a period of at least 24 hours, but more than 72 hours by discharging the water quality volume at a low flow rate. A stone filter is proposed at the outlet structure to provide treatment. The top of the stone filter is equal to the water quality water surface elevation. The stone filter is shown on the AOS Detail.

Table 2.2 Proposed Peak Flow Summary

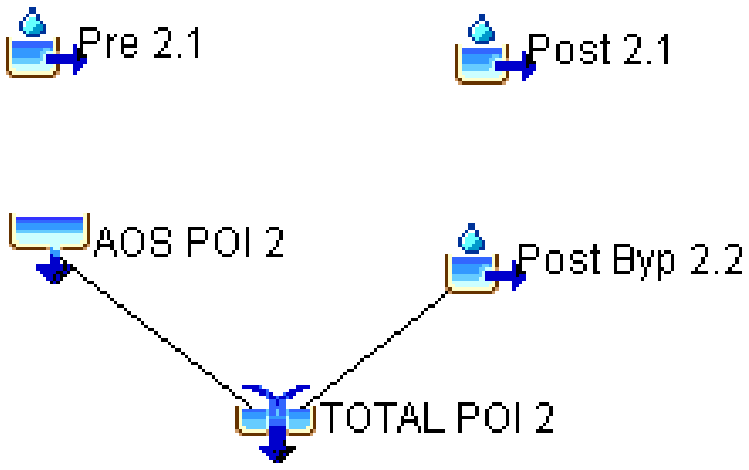
* NOTE: The “Total Post Peak” in the above tables represents the largest sum of the pond discharge and the peak offsite bypass discharge. The bypass basin peak occurs at a different time than the pond peak discharge due to the lag times.

Detailed printouts are included in the report.

Outlet Control Structure

An Automated Outlet Control Structure (AOS) will used for this project.

The AOS will be installed and maintained by Flood-Con LLC representatives. The automated outlet device will be fastened to an interior baffle wall inside the concrete box at the outlet. The AOS is a self-contained system powered by solar and battery, therefore not requiring an external power source.



Details of the maintenance schedule and annual post construction inspections as required by the city of Alabaster are provided in the maintenance agreement. Inspection reports and photos will be uploaded to Flood-Con’s website portal in accordance with the maintenance agreement.

Flood-Con’s website portal is accessible to authorized personnel. Typically, complementary access is provided to City representatives and the Engineer of Record. A detail of the AOS is provided below and is included in the civil plans.
